Delivering Best -In-Class
Furniture Across the Globe

How staging works?

1 SHORTER LEAD TIMES

Businesses who actively manage their inventory report a 50% reduction in lead times.

2 INCREASED INFORMATION TRANSPARENCY

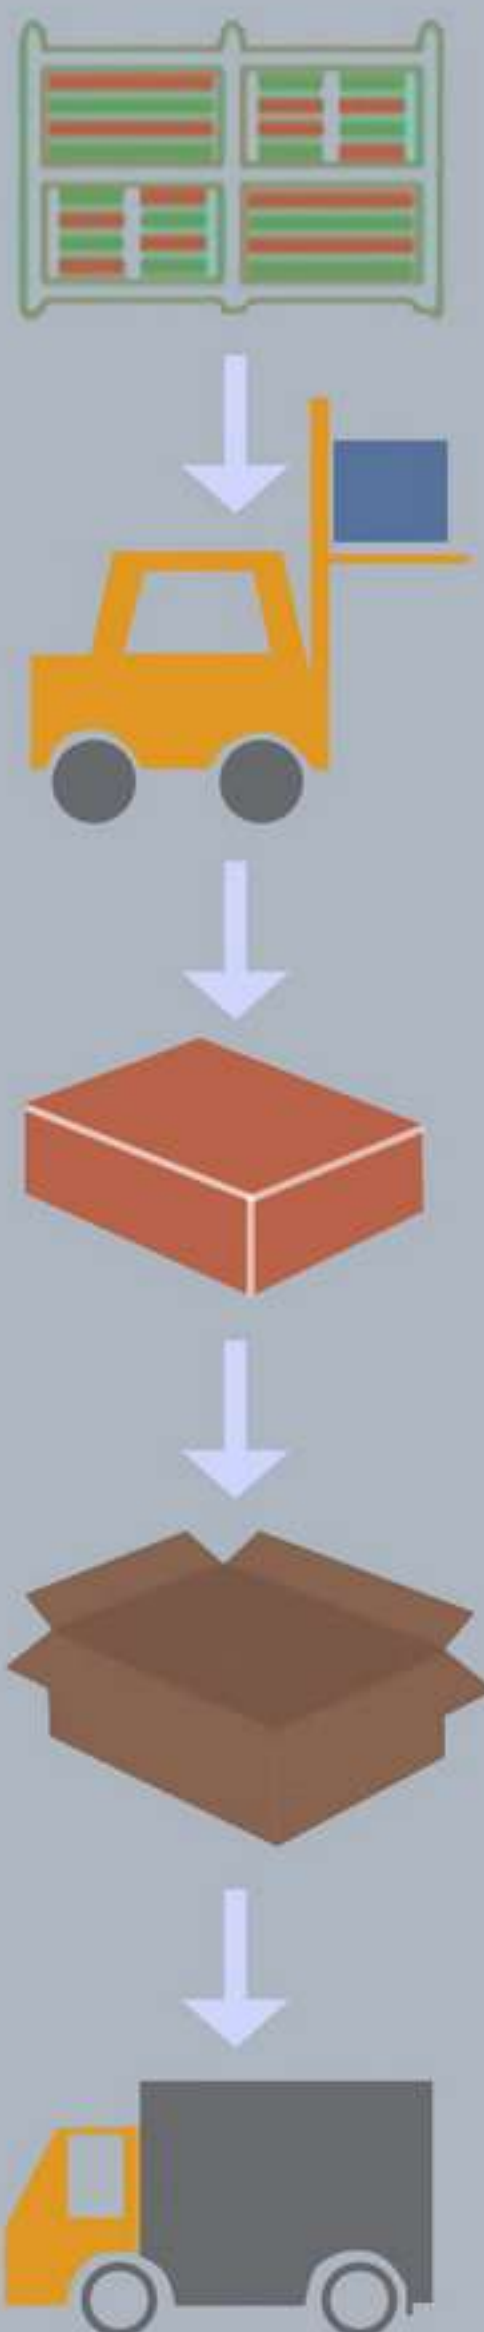

Know when items are received, picked, packed, shipped, kitted, manufactured, etc. Know when you need to order more, when you're over stocked, or under-stocked.

3 LOWER COSTS

Decreased inventory write-offs/write-downs plus lower inventory holding costs.

4 IMPROVED DELIVERY PERFORMANCE

Real-time inventory updates improve the flow of goods to customers

5 ACCURATE PLANING

Stay Steps ahead of the game and always have the right amount of products on hand by making decisions based on inventory trends.

6 INCREASED CUSTOMER LOYALTY

Improve your organization's accuracy and efficiency, and your customers will love you for it. They'll trust you to fulfill their needs and you'll have exactly what they're looking for when they come back for more.

WE make
empty houses
FEEL LIKE HOMES
TO POTENTIAL BUYERS

Why staging ?

The majority of buyers are not able to visualize the layout of the space.

So, while the finishes might look great, they can't understand how they would use the space. That is where we come in!

We bring in furniture, that help buyers connect emotionally with the home, as well as be able to visualize how they would live in the home.

Sell quicker & for more

Staging will help your listings sell quicker and for a higher sales price.

Your home doesn't have to sit on the market while you do price drop after price drop. Staging will help your listings sell quicker and for a higher sales price than if you didn't stage.

Stand Out

Staging will help you stand out from the competition.

Grab buyers' attention from the start with listing photos that include beautiful staging. Trust us - you will stand out from competing listings already! And once they see the home in person with all of the inviting and pretty furnishings, they will feel at home and be able to imagine themselves in the home.
